Dear ,

After additional due diligence and discussions with the solicitors, we have determined that fire suppression systems are non-removable equipment and are LSI eligible events. The amount of LSI as a result of the installation of a fire suppression system cannot be determined until the project is complete and the concessioner has complied with the requirements for LSI as defined in their contract.

Please let me know if you have any other questions. We look forward to meeting with you and your team on January 7, 2016 to discuss this and other ongoing projects.

Sincerely,

Superintendent
